

## Journal of Camelid Science

ISSN: 1999-8732

### About

The *Journal of Camelid Science* (JCS) is the official journal of the International Society of Camelid Research and Development (ISOCARD). It is the leading peer-reviewed camelid research. JCS releases one issue a year and publishes invited reviews, original research papers, short communications, case reports and letters to the editor. Articles published in JCS cover a broad range of research topics in camelid husbandry, nutrition, physiology, genetics, and camelid products.

### Aims and scope

- To disseminate knowledge for sustainable use of camelids for food and other human need.
- Camelid Science is a peer-reviewed journal that publishes original and review articles focussing on camelid (camels, alpacas, llamas, vicunas and guanaco) sciences. The areas of interest are anatomy, physiology, nutrition, genetics, production, reproduction, management and diseases.
- Timely review articles will be considered. They should focus on any aspects concerning camelids. The articles should present comprehensive, critical summaries of current knowledge in the field and should not be limited to a discussion of the author's work.
- The journal is aimed to foster communication and collaboration among scientists working in research institutes, universities, governmental institutions or nongovernmental organisations, private firms and the pharmaceutical industry.
- Hard copy and on-line journal will be published twice a year (June and December).
