

7th International Conference of ISOCARD, Alxa Right Banner, Inner Mongolia, China, Sep 8-13, 2026

Conference recommendations

- Alxa Right Banner is an important World Capital for Camel Milk (WCCM).
- Establish an international research centre for camel research (IRCCR) at Alxa Right Banner.
- Support fundamental and applied research projects to bridge gaps in our knowledge.
- Develop common approaches and reliable phenotype measures
- Address the phenotype-genotype gap by harmonizing phenotypic recording, animal identification, pedigree documentation and genomic data integration, e.g., by establishing an International Camel Recording and Improvement Network (ICRIN).
- Encourage and foster research into water use in camel farming and for the production of feeds for camels.
- Encourage and foster research into camel health and welfare
- Develop multidisciplinary approaches to provide sustainable solutions and solve emerging problems under climate change.
- Share knowledge via scientific exchanges and transfer knowledge to camel owners and industry via workshops
- Share data by supporting open access data storage and publishing
- Encourage stronger links between scientists, producers, industry, governments and the communities that depend on camels.
- Create opportunities for the next generation of camel scientists via mobility programs and travel grants.
